

Git Cherry pick

Steps cherry-pick with commit:

1. Switch to **His branch** – get the id of the commit that you want
2. Switch back to **My Branch**
3. **Execute: git cherry-pick a6817d7**
4. **Execute: git log**
5. You will see the **commit** but it will have a different **commit id** on your branch (**My Branch**)
6. You can cherry-pick multiple commits by leaving a space for example:
Execute: git cherry-pick a6817d7 deefb1 ccd12b

Steps cherry-pick without commit:

3. Execute: `git cherry-pick a6817d7 -n`
4. Execute: `git add .`
5. Execute: `git commit -m "Cherry pick"`
