	Use this column to compare with copper equiva- lents shown on right.		Red shows SWA too small to be used as protective conductor. Taken from table 54G (but may comply by calculation)			SWA a	shows dequate le 54G	Red shows SWA too small to be used as protective conductor. Taken from table 54G (but may comply by calculation)				Green shows SWA adequate to table 54G		For reduced neutral and single core aluminium wire armoured cables, refer to BS 6346 (PVC) & BS 5467 or BS 6724 (XLPE) for armour wire total cross sectional area.
